

**Client:** Blue Diamond  
**Sector:** Retail and eCommerce

## Blue Diamond is a chain of garden centres located all over the UK.

### The challenge

Blue Diamond wanted to make data entry faster for Payroll, as it was taking three people, two weeks to enter employee hours.

### The solution

Using the Opera Importer module, Enhanced created an import template which allows Blue Diamond to populate a spreadsheet which can then be imported.

### The results

By creating the import template and taking out the element of manual input, Enhanced was able to successfully cut down the amount of time needed to import the company's employee hours.

### The benefits

- **Decrease in the amount of time taken to import employee hours**
- **No chance of any human error, making spreadsheets more reliable.**

“We have been working with Enhanced for nearly 15 years and have been increasingly impressed with their outstanding customer service and total commitment to our needs.”
